

PLANT DNA/RNA Isolation Kits

FavorPrep™ Plant DNA Isolation Kits

- Rapidly isolates DNA from plant tissue in approx. 30 to 60 minutes. Removes polysaccharide and phenolic inhibitors from DNA.
- The Kit can be used for plant tissue, plant cell and fungi.
- Expected yield from Mini is about 40µg and from Maxi about 600µg.
- The DNA is suitable for variety of application including amplifications, digestion etc.
- Available in Mini & Maxi Format.

| CATALOG NO. | Description | Kit Size |
|-------------|--|-----------|
| FAPGK 001 | FavorPrep™ Plant Genomic DNA extraction Mini Kit | 50 Preps |
| FAPGK 001-1 | FavorPrep™ Plant Genomic DNA extraction Mini Kit | 100 Preps |
| FAPGK 002 | FavorPrep™ Plant Genomic DNA extraction Maxi Kit | 10 Preps |
| FAPGK 002-1 | FavorPrep™ Plant Genomic DNA extraction Maxi Kit | 24 Preps |

FavorPrep™ Plant RNA Isolation Kits

For isolation of total RNA from plant tissues, plant cells, fungi. Safe and easy protocol uses NO phenol/chloroform extraction, CsCl gradients or ethanol precipitation.

- Rapid isolation of total RNA from plant tissues in only 30 to 60 minutes
- The RNA is highly pure with OD 260/280: 1.9-2.1
- Yields up to 30 pg high quality total RNA from Mini & 6 mg from Maxi.
- Available in Mini & Maxi Format
