

safeVIEW

safeVIEW blue
light
transilluminator
offers a safe
way to view
and document
samples

- No DNA damage to samples
- Safer for user - No UV light
- High Purity LED light
- Compact Design
- Strong Metal enclosure with stainless steel filter frame
- Fast start up

EZEE safeVIEW LED transilluminator offers a safe way to view and document samples.

This light source also has the added advantage that it does not cause damage to DNA or RNA that would normally be associated with UV light.

They are supplied as a standalone unit and can be used with the microDOC, as part of a fully integrated gel documentation system. With a large surface area, each transilluminator serves as the perfect workstation for viewing and working with fluorescently-stained protein and nucleic acid gels.
